1. INTRODUCTION

The Government of the Republic of Kosovo within its priorities continued its engagement during 2015 and

- 2016 in creating and increasing the cooperation with civil Society, in particular with Nongovernmental Organizations. To this purpose, the Office of the Prime Minister/Office on Good Governance, with the support from international partners and donors, is working to improve the decision making, accountability and transparency process through public consultations. The European Commission Progress Report 2016 has praised the transparent and inclusive process of publishing the regulation on minimal standards of public consultation, which stipulates a greater involvement of civil society in the process of drafting governmental policies. The Office of the Prime Minister/Office on Good Governance, together with the Ministry of Finances, and with the support of the EU Technical Assistance Project Team "Support for the Implementation of the Government Strategy for Cooperation with Civil Society", in compliance with the Government Decision No. 05/89 date 25.05.206 on the selection of the MIXED model of financing NGOs, were obliged to draft the Regulation on the standards and criteria for the distribution of funds. Based on this decision the Working Team that prepared the draft regulation was created.

The draft regulation on criteria, standards and procedures for public financing of NGOs was prepared together with the monitoring and reporting methodology as well as its implementation manual. These documents are in the internal consultation stage and in late March are expected to be ready for public consultation. These rules shall enable a transparent support based on preset criteria, an open competition of NGO projects and programs and also a greater transparency towards the audience in relation to the projects and programs of benefiting NGOs. These rules, criteria and procedures on the public financial support for NGOs are expected to enter into force and stat being implemented in 2017.

The model selected by the Government to provide public financial support for NGOs is a mixed model, with central level preset rules, but decentralized in relation to the institutions providing the public financial support for NGOs. In this context, based on Decision of the Government¹ 1 to adopt this model, it was decided that the role of the Office on Good Governance/Office of the Prime Minister shall be to assist in increasing the transparency by publishing the necessary information during the preparation stage of the public financial support for NGOs, and in particular to prepare that annual report on public financial support for NGOs. The adoption of the legislation on the criteria and procedures for the public financing of the NGOs, shall also structure the monitoring and reporting method on the public financial support for NGOs.

This report, the first of this kind prepared by the Government of the Republic of Kosovo pertaining to the public financial support for NGOs contains the basic information on public financial support for NGOs from budgetary organizations, including ministries, municipalities and other independent agencies of the Republic of Kosovo. As this is the first report of this kind prepared by the Government of the Republic of Kosovo, it contains basic information,

¹ Decision No.05/89 date 25. 05. 2016 of the Government of Kosovo on the Selection of the Mixed Model for the Public Financing of Non-governmental Organizations.

but we believe that the approval of the regulation on the criteria, standards and procedures for public financing of NGOs and the publication of this report shall increase the awareness of the reporting institutions on the importance of transparency, and shall improve the quality of the data reported in the future. We consider that starting to prepare this report shall contribute in increasing the transparency and accountability of public institutions and at the same time shall impact in improving of the cooperation with civil society in the Republic of Kosovo. Increasing the transparency on the public funds provided to civil society is also a requirement of the European Commission Kosovo Progress Report, which highlights: "Information on all public funds distributed to civil society organizations should be easy accessible to the public."² This report also requires the adoption of the secondary legislation in this field.³ Therefore, the preparation of this report is also in line with the demands of the European Commission Progress Report Kosovo 2016.

The Government of the Republic of Kosovo is dedicated to increase the transparency and accountability of public institutions and the creation of the mutual trust between social society and public institutions. Therefore, preparation and publication of this report serves to this purpose.

1.1 Used methodology

The report on the public financial support for NGOs from the institutions of the Republic of Kosovo in 2015-2016 has been prepared based on the data obtained from the Ministry of Finances, namely the treasury. The data obtained from the Treasury include all the payments that have been executed between January 1st and December 31st of the respective year for the suppliers registered with the Treasury as Non-governmental Organizations. These data are further structured according to ministries, municipalities and other agencies, and the same were forwarded to the respective institutions for validation, namely to comment them. The comments of the institutions have been analyzed in particular in relation to whether there was a public tender or not for such support, and as much as it was possible to see the objectives of such financial support.

Considering that the data obtained from the Ministry of Finances are grounded on payments and not the financed projects or programs, for the preparation of this report these data have been processed so that if an NGO has received within a year different amounts of money from the same institution or various departments of the same institution, they have been summed up and presented as one single financial amount for the same NGO within the respective year in the annexes attached to this report.

Although, certain projects within the various institutions may have been approved with higher amounts than the ones presented in this report because not all the approved amounts may have been executed during the fiscal year, in order to preserve the uniformity of the

² European Commission Progress Report Kosovo 2016, f. 9, electronic version at:

https://ec.europa.eu/neighbourhoodenlargement/sites/near/files/pdf/keydocuments/2016/20161109reportkoso_vo.pdf

³ Ibid

methodology of used data, this report contains only the amounts executed and reported to the Treasury. After the regulation on the criteria, standards and procedures for public financing of NGOs is approved, together with the monitoring and reporting methodology and the manual for its implementation, for future reports the methodology envisaged by the same regulation should be fully implemented.

This report has been prepared by the Office on Good Governance/Office of the Prime Minister, line ministries, and municipalities with the support of the Technical Assistance Project financed by the European Union Office in Kosovo "Support for the Implementation of the Government Strategy for Cooperation with Civil Society".

2. GENERAL DATA ON THE PUBLIC FINANCIAL SUPPORT FOR NGOs FROM MINISTRIES, MUNICIPALITIES AND OTHER INDEPENDENT AGENCIES

During 2015 and 2016, the Ministries of the Republic of Kosovo, Municipalities and other public agencies have continued supporting activities of Non-Governmental Organizations, including financing specific projects, or directly supporting NGOs and their projects. Based on the data obtained from the Treasury of the Ministry of Finances, which are based on the executed payments through the *free balance* system it turns out that the public financial support transferred to NGOs by public institutions including central institutions (the Office of the Prime Ministry and Ministries) Office of the President, independent agencies and municipalities during 2015-2016 is **27,859,305.00 Euro**. In 2015 NGOs received **13,975,988.32 Euro** and in 2016 **13,883,316.78 Euro**. If we compare 2015 and 2016, we notice an increase of the support at the ministries' level, and a slight decrease at the municipalities' level. If we compare the financing of NGOs between the central level - Ministries and other Agencies and Municipalities, we notice that both in 2015 and 2016 the municipalities allocated 1.5 million Euro more than ministries. The following graphic represents a comparison of public financing support for NGOs in Kosovo in 2015-2016.

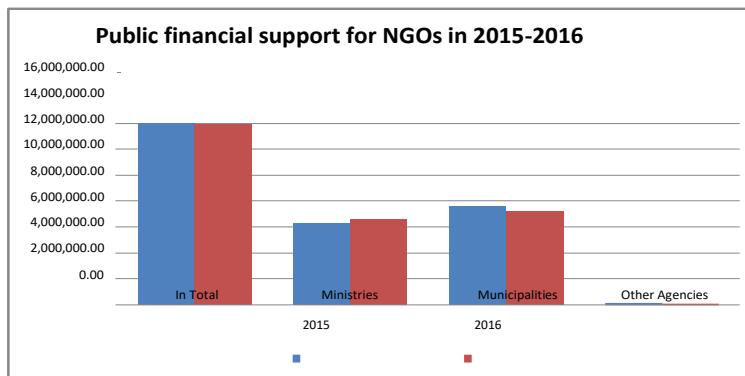

Figure 1

From the analyzed data we see that the number of benefitting NGOs is considerable. So, in 2015 745 NGOs received payments from the Ministries, and in 2016, 711 NGOs. At the municipality level this number is even higher and in 2015, 955 NGOs have received public funds whereas in 2016, 936 NGOs. The data presented in this report have been prepared based on the data obtained from the Treasury in the Ministry of Finances, and as such constitute any form of financial support that went to Suppliers who are registered by the Treasury as Non-governmental Organizations.

The following graphic shows a comparison of the number of NGOs benefitting from ministries, municipalities and agencies:

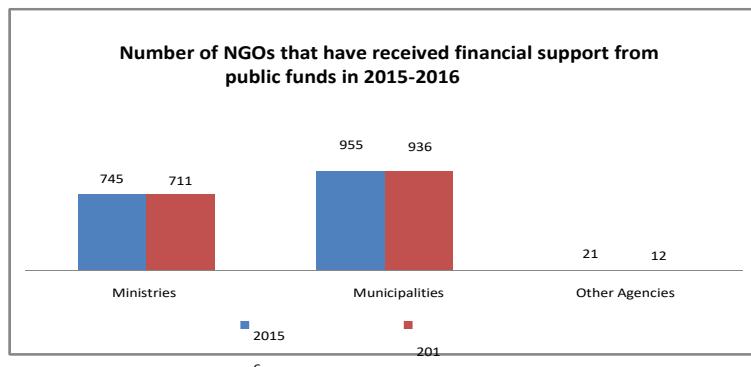

Figure 2

From the processed data it is understood that the amount of public financial support in 2015-2016 is approximately similar, a decrease in the number of benefitting NGOs during the report period is noticed. However, this drop in the number of beneficiaries is very small.

3. DATA ON THE PUBLIC FINANCIAL SUPPORT FOR NGOs ACCORDING TO MINISTRIES, MUNICIPALITIES AND OTHER AGENCIES

3.1 Support from Ministries

The data presented below show the amount of the public financial support for NGOs- from the respective ministries in 2015-2016. As can be seen, in 2016 all 15 ministries have increased their financial support for the NGOs compared to the previous year. If we compare the data on the public financial support, we may conclude that the institutions that have supported the most NGO projects are the Ministry of Culture, Youth and Sports, Office of the Prime Minister, Ministry of Labour and Social Welfare, Ministry for Community and Return, Ministry of Agriculture, etc. Figure 3 below is a graphic presentation of public financial support data for NGOs from the Ministries, Office of the Prime Minister and Office of the President in 2015-2016.

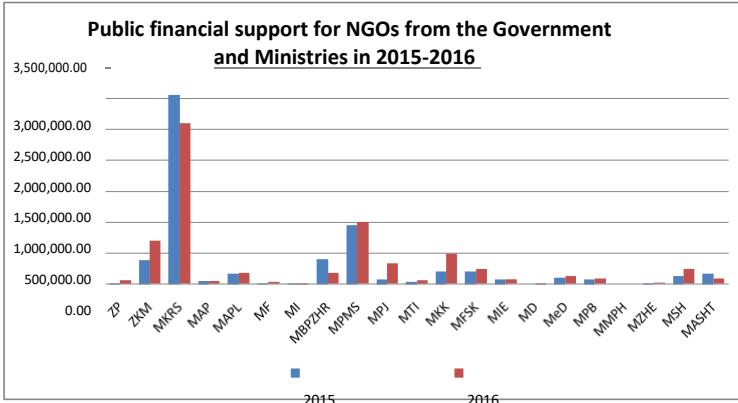

Figure 3

Although the data obtained from the Treasury in the Ministry of Finances as well as the data obtained from the ministries were incomplete so the purpose as well as the objectives of the public financial support are unclear, from the available data is clear that the public financial support to a certain point is in line with the strategic objective and the field of responsibility of the institutions/ministries providing this public financial support. There are, however, cases of financial support for NGOs when the support is not directly connected to the field of responsibility of the institutions that provide the financial support.

We should stress the fact that a considerable amount of benefitting organizations are NGOs of minority communities in Kosovo, in particular the Serbian community. In this sense it is noted that the Office of the Prime Minister and the Ministry for Community and Return have supported a considerable amount of minority communities organizations, in particular the Serbian community.

Based on the available data, it is difficult to tell the difference between the directly financed and supported projects and programs, contracted services or the purchase from NGOs, because these data also contain the contracted services, education and training services, etc. which are provided by registered non-governmental organizations.

Figure 4 below shows the number of NGOs benefitting from respective ministries. Although in many cases NGOs have received more than once payments from the same institutions, the figure below shows the processed data on the number of beneficiaries from each ministry; this implies that even in the cases when one NGO has benefitted more than once during a year, for the purpose of this report the same is considered as one benefitting NGO. This figure shows that the greatest number of benefitting organizations have been supported from the Ministry of Culture, Youth and Sports, with more than 400 organizations benefitting each year, followed by the Office of the Prime Minister with over 100 NGOs supported in 2016, Ministry of Agriculture, ministry of Labour and Social Welfare, Ministry for Community and Return, and Ministry of Diaspora with about 70 NGOs each. So, in 2015 Ministries provided

public financial support for **745 NGOs**, and in 2016, **711 NGOs**. It is important to highlight that in most cases the same NGOs benefitted both in 2015 and 2016.

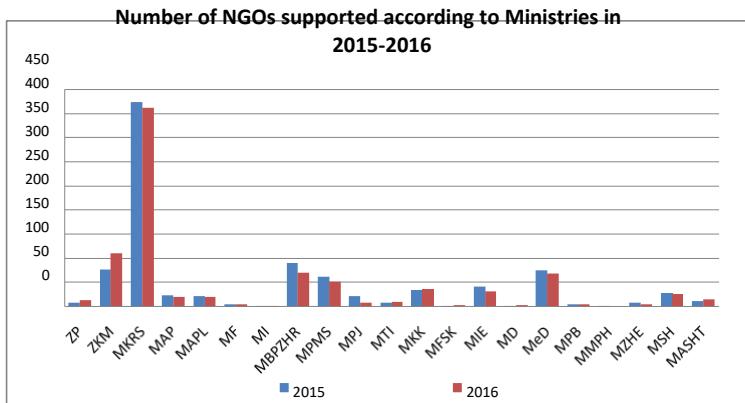

Figure 4

From the analyses of the processed data on the public financial support for NGOs provided by the Ministries of the Government of the Republic of Kosovo, we may notice that the greatest number of non-governmental organizations have benefitted up to 5,000 Euro. From the total number of 745 benefitting NGOs in 2015 and 711 in 2016, about 500 NGOs each year have received lower amounts than 5,000 Euro. A considerable amount of public financial support for NGOs has been provided based on direct NGO requests, and some of the Ministries conducted public tendering procedures for a part of the public financial support. The figure below is a graphic presentation of the data pertaining to the number of benefitting NGOs according to respective amounts.

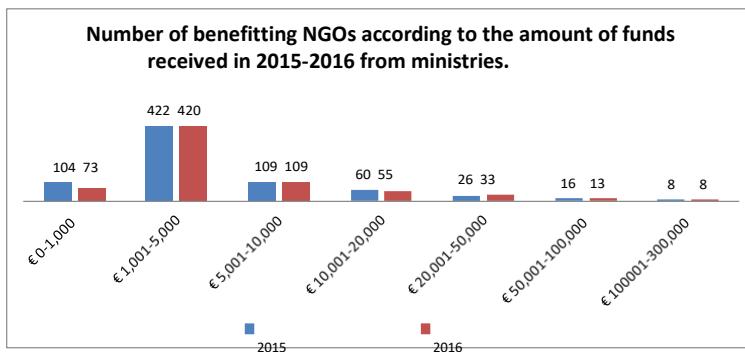

Figure 5

The data in figure 5 show that the majority of the beneficiaries have received up to 5,000 Euro form public financial support. These data are particularly important in the process of preparing the legislation related to the criteria, procedures and standards for the public financing of NGOs, and especially to determine up to what amount public institutions shall be able to provide financial support without conducting public tender procedures.

3.2 Support from Municipalities

Kosovo currently has 38 municipalities, out of which 37 have provided public financial support for Non-governmental Organizations. In 2015 the Municipalities have paid out 7,601,079.52 Euro to the benefit of non-governmental organizations, and in 2016 a total of 7,212,827.35 Euro. So when the two years are compared, 2016 registers a drop 0.4 millions in financing. In 16 of the municipalities we have a positive trend in the increase of the financial support compared to 2015.

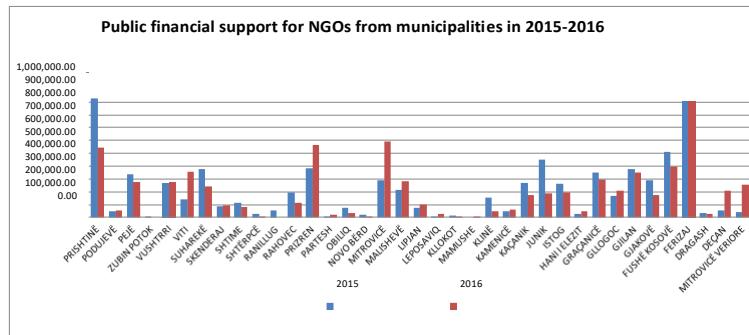

Figure 6

Office of Good Governance/ Office of the Prime Minister through the Ministry of Local Government Administration, asked each of the municipalities to give their comments on whether the public financial support for NGOs was completed based on public tenders or direct contracting. At the municipal level the contracting was mainly direct and based on the requests of non-governmental organizations. In many cases the support was even provided with the decisions of Municipal Assemblies of the respective municipalities. As far as the purpose of the financial support is concerned, it is mainly related to sports, culture and support for NGOs that promote local development, etc.

A great number of non-governmental organizations have been supported at the municipal level in the Republic of Kosovo. It is important to highlight that in most cases the same NGOs benefitted both in 2015 and 2016. The following figure shows graphically the number of NGOs that benefitted in each of the municipalities during the reporting period.

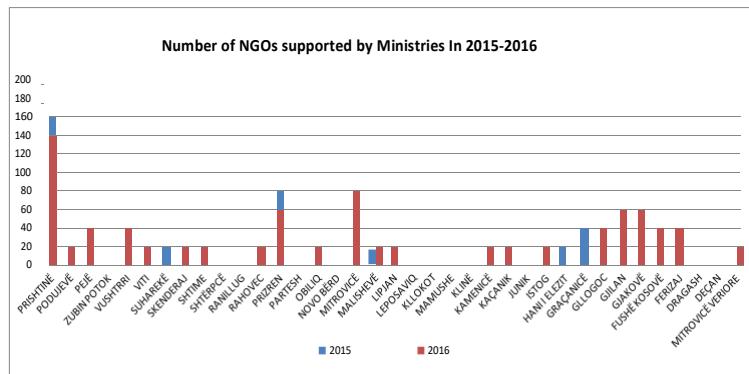

Figure 7

From the analyses of the available data, it is noticed that the benefitting non-governmental organizations at the municipal level mainly conduct their activities in the territory of the respective municipalities. Moreover, some of the NGOs have benefitted in several municipalities, mainly in those located in the same region of the Republic of Kosovo. Some of the municipalities, however, have also financed NGOs that conduct their activity Kosovo-wide, especially those active in sports and those that aim to support certain social groups in need, including persons with special needs.

Similar to the Central level, the highest amount NGOs could benefit was up to 10,000 Euro. The data show that the higher the benefitted amount is the number of benefitting NGOs decreases.

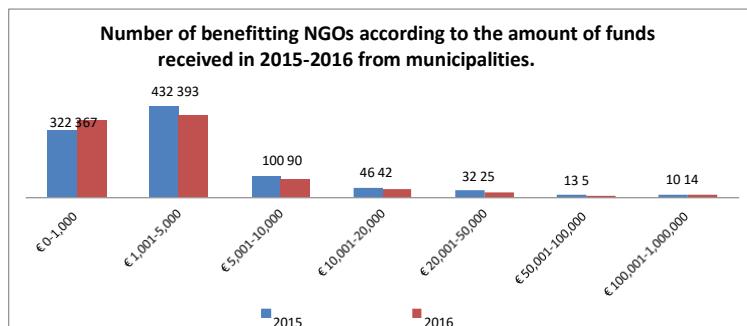

Figure 8

3.3 Public financial support from independent agencies and other public institutions

Compared to the public financial support at the Central and Municipal level, the financing provided by independent Agencies is lower, namely 143,923.55 Euro in 2015, and 80,079.60 Euro in 2016. The financing for NGOs went mainly to NGOs as part of direct service provision agreements. The number of beneficiaries is also lower. See fig. 9 and 10.

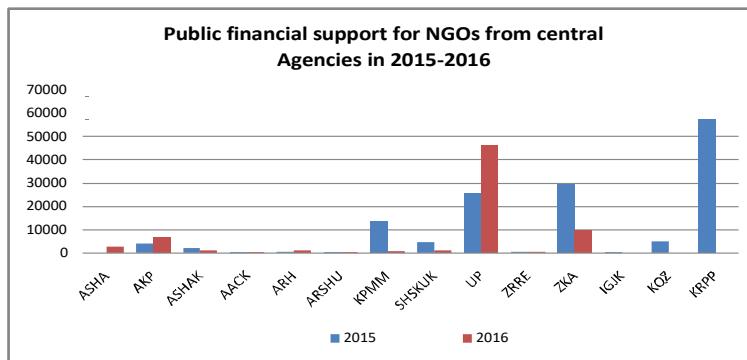

Figure 9

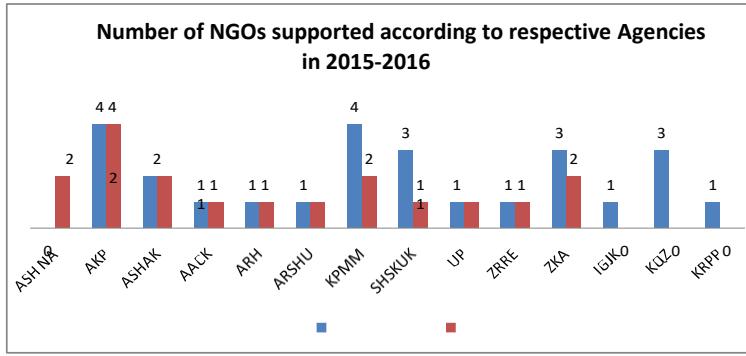

Figure 10

4. TRANSPARENCY AND COMPETITION UPON THE PROVISION OF PUBLIC FINANCIAL SUPPORT FOR NGOs

Currently, namely during the 2015 – 2016 period the Government of the Republic of Kosovo or the Ministry of Finances have not adopted any unifying legislation that would enable a transparent distribution of public funds to non-governmental organizations and based on a true competition. However, there is a legislation regarding the management of Public Finances, including the Law on Public Financial Management, which constitutes the ground to provide public financial support for NGOs; then there are a great number of financial rules and administrative instructions that are related to the management of public money, and which are applicable to all public institutions. Moreover, there are legal rules within the public procurement legislation, which in specific cases may be applied, especially in relation to the contracting of services from non-governmental organizations.

In lack of such unifying rules, many of the Ministries and Municipalities have adopted sub-legal acts regulating the issue of distributing grants/subventions, including the distribution of grants and subventions for NGOs from the respective institutions, although the legal ground to adopt such regulations is flawed, considering that pursuant to the Law on Public Financial Management the Ministry of Finances has exclusive competencies in managing public finances. Article 53 of the LPFM stipulates that: *The Minister shall have the exclusive authority to issue rules governing the process that shall be followed by the concerned budget organization or public authority when selecting the recipient or recipients and determining the amount or amounts to be provided as a grant, donation or subsidy. Such rules shall ensure that the process is strictly aimed at achieving the intended purpose of the Assembly when it authorized such grant, donation or subsidy in the concerned Appropriations Law.*⁴

Despite the fact that the legal ground for adopting such sub-legal acts was incomplete, in the absence of unique rules adopted by the Ministry of Finances or the Government of the Republic of Kosovo, these sub-legal acts have ensured a basic transparency and competition upon the provision of public financial support for NGOs. However, the criteria stipulated by these regulations are not similar, and they differ from one institution to the other. Some of these sub-legal acts contain the proper elements for

⁴ Article 53, par. 3, Law No. 03/L-048 Law on Public Finances Management and Accountability. Electronic version available at: <https://gzk.rks-gov.net/ActDetail.aspx?ActID=2524>

transparency and competitiveness however, they are not unified. Such as the legal sub-acts of the MEI, MCYS, MLSW, MPA, some of the municipalities, etc.

During the drafting of this report, public institutions were asked whether they had conducted public tenders for the provision of public financial support to NGOs. In this context, a considerable number of public institutions responded that they had opened public tenders; however, this was not done in all the cases of financial support. Considerable amounts of financial support were distributed through decisions and direct contracting, which results in lack of full competitiveness upon the provision of public financial support.

5. CONCLUSIONS AND RECOMMENDATIONS

Conclusions:

- From the analyses of the Public Financial Support for NGOs in 2015-2016 clearly shows that the Government of the Republic of Kosovo and other public institutions provide considerable financial support for Non-governmental organizations in the Republic of Kosovo.
- Although, at this stage it was difficult to identify the territorial expansion of the financed projects/programs, the gathered data show that the benefitting Non-Governmental Organizations come from all the municipalities of Kosovo, since the municipalities participate with a considerable public financial support for NGOs. Speaking of public financial support for NGOs from municipalities, most of the benefitting NGOs exercise their activity in the territory of the municipalities that provide the public financial support.
- Besides the provisions of the Law on Public Financial Management and Accountability, there are no unique rules that would regulate the distribution of public funds to NGOs. In lack of these rules many of the public institutions have adopted their rules that apply to those institutions, but these rules establish different approaches for the provision of public financial support for NGOs from Ministries and Municipalities in the Republic of Kosovo.
- In general, there are no public records on the monitoring of the financed projects and programs of NGOs.
- So far, most of the public institutions have not published data on the public financial support for NGOs. Therefore, preparation of such accessible, transparent and accountability data on these funds have been the priority of the Government of the Republic of Kosovo and international partners, in particular the European Commission through Progress Reports.

Recommendations

- The Government of the Republic of Kosovo should as soon as possible Adopt the Regulation on the Criteria, Standards and Procedures of Public Financing for Non-governmental Organizations. This Regulation has already been drafted and is currently undergoing inter-institutional consultations.

- Public institutions, including ministries, municipalities and independent agencies should increase the transparency in relation to the public financial support by preparing regular annual reports on the public financial support for NGOs. Among other, these reports should include: a) Name of the public financial support provider (Ministry, municipality, agency, including specific programs through which the public financial support is provided); b) Public financial support allocation method (through tendering/ direct contracting); c) Public tendering through which the financial support has been provided; d) Full name of financial support beneficiaries (including the beneficiary's other data, Address, Registration and Fiscal number and the data on the NGOs responsible person); e) Name of project/program or financed activities; f) The amount allocated for the financing of the project/program; g) Duration of the project and the status of its implementation; h) General and specific fields of financing; i) Direct and indirect beneficiaries, j) Main activities or services conducted during the project; k) Geographical data in relation to the location of the implemented project; l) Number of persons that have benefitted or have been employed within the project/program.
- Once the new rules, which are currently in the final stage of approval, on the public financing of NGOs enter into force public institutions should increase their capacities for planning, implementing and monitoring the NGO projects financed through public funds.
- The Government of the Republic of Kosovo should improve the policies coordination process in order to ensure a unique implementation of the legislation on the public financing of NGOs from all public institutions.
