Opening remarks

Dear all,

We are continuing also this year with a successful practice of publishing the annual report on public funding support to non-governmental organizations in the Republic of Kosovo. Certainly, this is a joint success of the Government of the Republic of Kosovo and of civil society in Kosovo. In addition to the publication of this Report, the launch of the NGO public funding platform, which includes all data on public funding of NGOs since 2015-16, is a particular success and a step towards enhancing transparency of public institutions in this area.

2021 is considered as a successful year in terms of cooperation between institutions of the Republic of Kosovo and civil society organizations. This cooperation has continued to be in view of the implementation of the priorities of both sectors, but also of the achievement of the government objectives for transparency, accountability and responsibility defined by the Regulation MoF No. 04/2017 on Criteria, Standards and Procedures on Public Funding of NGOs. The basis of this cooperation is also set in the Government Strategy for Cooperation with Civil Society 2019-2023.

The Office of Good Governance within the Office of the Prime Minister has provided and continues to provide an ongoing contribution to advancing transparency and accountability in the provision of public financial support to NGOs during 2021. The contribution of the OGG/OPM should be seen beyond this report, in particular in providing support to public officials as well as to NGOs, through training and capacity building of public institutions in order to better implement the Regulation MoF-No. 04/2017 on Criteria, Standards and Procedures on Public Funding of NGOs.

This report enables us to understand the progress that Kosovo has made in terms of public funding of NGOs, but also of the Government's cooperation with civil society. At the same time, it highlights the challenges that need to be addressed in the future, in order to for this field to advance further. This report provides a set of recommendations which the Office of Good Governance/Office of the Prime Minister and the Ministry of Finance will commit to implementing in practice together with public institutions.

The Office on Good Governance/Office of the Prime Minister encourages all public institutions to strengthen their mechanisms in order to implement the requirements of the legislation in force related to public funding of NGOs. This will enable the increase of trust in public institutions and the establishment of partnerships with civil society organizations. Implementation of procedures, criteria and standards for transparency, accountability and competition will enable the achievement of the objectives for the public funding of NGOs.

Sincerely,

Habit Hajredini, Director, Office on Good Governance - Office of the Prime Minister

1. INTRODUCTION

In order to implement the rules and procedures for Public Financing of Non-Governmental Organizations as defined by the Regulation MoF. No. 04/2017 on Criteria, Standards and Procedures for Public Financing of NGOs, the Government of the Republic of Kosovo, through the Office of Good Governance within the Office of the Prime Minister, together with line ministries and municipalities of the Republic of Kosovo has continued with the publication, collection and reporting of data on Public funding of NGOs.

Office of Good Governance/Office of the Prime Minister together with the Ministry of Finance, based on Regulation MoF-No.04 / 2017, Kosovo has built a system with unique rules regarding public funding of NGOs. These rules define the minimum criteria related to public funding of NGOs. Regulation MoF-No. 04/2017, among other obligations, defines in detail the responsibility that public institutions have for reporting on public funding of NGOs. The regulation aims to unify procedures for the entire cycle of public funding of NGOs, including planning, public calls, contracting, monitoring and reporting of this funding.

The report on public funding of NGOs for 2021 includes information on public funding of NGOs, provided by the Government of the Republic of Kosovo and Municipalities to support projects of Non-Governmental Organizations in various fields, related to priorities of the Institutions of the Republic of Kosovo and Kosovar society. The report covers all central and local level budget organizations which in any form have provided financial support to non-governmental organizations.

The reporting process for NGO funding has continuously been updated, not only by creating and launching the funding platform, but also by enabling direct reporting on the NGO public funding platform <http://ojqfinancime.rks-gov.net>

During this time we have worked on upgrading the platform, where with an easy search on the online platform, data on public financial support for CSOs by years, institutions, NGOs, regions, fields, etc., can be found. For the first time this year, we will achieve full transparency of budget expenditures for the civil society sector by providing all the data of the process of spending public money on NGOs. Work has been done and it has been managed to draft and publish the 2021 report directly on the platform. Therefore, all budget organizations will report directly through the platform, by uploading data on public funding of NGOs that have been supported.

This process has continuously been upgraded. So since 2020, the platform <http://ojqfinancime.rks-gov.net>, which ensures even greater transparency of spending public money on NGO projects and programs. In 2021, the platform has been upgraded and will enable all budget organizations to report directly through it, uploading data on public funding of NGOs for the previous year. This will enable increased transparency in the funding of NGO projects, by publishing more data on projects funded by public authorities. This process requires increased commitment for Budget Organizations, and at the same time better coordination within the Budget organization itself and the Office on Good Governance within the Office of the Prime Minister, in fulfilling the

obligations arising from the Regulation MoF No. 04/2017 on Criteria, Standards and Procedures for Public Funding of NGOs.

The publication of the comprehensive report on public funding of NGOs in the Republic of Kosovo for 2021 has become a continuous practice of the Government of the Republic of Kosovo in recent years. This report aims to increase the transparency and accountability of public institutions, while also enabling the establishment of mutual trust between public institutions and civil society. Therefore, the continuous publication of annual reports on public funding of NGOs has given its positive effects in improving the implementation of legal regulations covering the field of public funding of NGOs in the Republic of Kosovo.

From the first report of the year, when there were no rules regarding the criteria, standards and procedures of public funding of NGOs, until 2021, there is a great qualitative improvement in terms of establishing the legal framework, and in its practical implementation. The Office of Good Governance within the Office of the Prime Minister is constantly working with public institutions to increase transparency, accountability and to properly implement the legal framework governing this area. The publication of the Annual Reports on public funding of NGOs has received positive evaluations from all institutions, civil society but also from the Report of the European Commission, considering it as a positive step towards greater transparency of public funding of NGOs. There is already a good practice established in all budget organizations to open public calls for funding of NGO projects. An improvement can be seen in the application and enforcement of the regulation regarding public funding of NGOs. Institutions have published public calls on their websites in most cases, and they are accessible online. However, there are still cases of providing direct public funding. Likewise, although the regulation is clear in its requirements, some of the budget organizations, despite having published public calls, have not been fully in line with the requirements of the regulation, or have not been clear enough and related to the priorities of the institutions defined in strategic documents.

In terms of reporting and publishing information on public funding of NGOs for 2021 by Budget Organizations, there is plenty of room for improvement of the situation, because even at the time this comprehensive report was prepared, some Budget Organizations still do not have published reports on public funding of NGOs for 2021 nor have they sent them to the Office on Good Governance/Office of the Prime Minister in accordance with the requirements of the Regulation.

As a result, this year, the Office on Good Governance, in order to better inform the public about public funding of Non-Governmental Organizations, has cooperated with the Ministry of Finance, namely with the Treasury. This was aimed at preparing a report as comprehensive as possible, based on the payments that Budget Organizations have executed for the beneficiaries who are registered in the Treasury as Non-Governmental Organizations. Similarly, in the annex, the data reported by the Budget Organizations are presented, i.e. the data as required by the Regulation for those organizations that have fulfilled the Legal Obligation for Reporting. We believe that the publication of this report will contribute to increasing the transparency and accountability of public institutions

and at the same time will have an impact on improving cooperation with civil society in the Republic of Kosovo.

The Office on Good Governance within the Office of the Prime Minister has worked with many Budget Organizations to strengthen their capacity to implement the requirements of this regulation.

We take this opportunity to thank all public institutions on behalf of the Office on Good Governance/Office of the Prime Minister for continued cooperation and at the same time we ask for their commitment and cooperation in the future!

1.1 Methodology used

The Office on Good Governance/Office of the Prime Minister, and the Ministry of Finance have already established a transparent and accountable system for funding Civil Society Organizations. The Office on Good Governance/Office of the Prime Minister has further strengthened the transparency and accountability of the allocation of public funds to CSOs by establishing but also updating and advancing the Online NGO Public Funding Platform <http://ojqfinancime.rks-gov.net/>.

This is definitely contributing to increasing public trust in public institutions and partnerships with civil society organizations. We also believe that this will inspire citizens to become even more active and contribute to the benefit of the community. Even at this time of reporting, as we mentioned above, we have worked on advancing the platform, where with an easy search on the online platform, data on public financial support on CSOs by years, institutions, NGOs, etc., can be found. For the first time this year, we will achieve full transparency of budget expenditures for the civil society sector by providing all the data of the process of spending public money on NGOs.

Similarly, the Assembly of the Republic of Kosovo has issued recommendations which we as institutions must implement in line with Regulation MoF-No. 4/2017 on Criteria, Standards and Procedures for Public Funding of NGOs and the legislation in force. The recommendations of the Assembly were approved in the plenary session held on 4 October 2021, after the Assembly reviewed the recommendations of the Commission for Public Financial Oversight regarding the performance audit report ""Transparency and accountability in the process of funding non-governmental organizations" for some institutions "".

The Office of Good Governance/Office of the Prime Minister, in accordance with the requirements of Regulation MoF-No. 04/2017 and the recommendations of the Assembly, has initiated the establishment of a permanent mechanism which will coordinate the planning and annual reporting on the funding of non-governmental organizations within each ministry and municipality. On 17.08.2021, the Office of the Prime Minister requested all Budget Organizations to designate contact points/coordinators who will be responsible for coordinating the process of reporting public funding to NGOs. In line with this initiative, the mechanism for reporting public funding to NGOs for the implementation of Regulation MoF-No. 4/2017 on Criteria, Standards and

Procedures for Public Funding of NGOs was established, based on the recommendations of the Assembly of the Republic of Kosovo approved on 4 October 2021.

Officials responsible for this process have been appointed by 14 ministries, 3 by the Office of the Prime Minister, as well as 30 by responsible municipalities. The Office of Good Governance/Office of the Prime Minister immediately started coordinating the work of this mechanism as well as capacity building of certain officials in accordance with the regulation. Together with the TACSO project and experts engaged by the project on 09 and 10 December 2021, we conducted information sessions for central and local level officials on planning and reporting public funding for CSOs. The two-day activity served to inform the appointed coordinators about their tasks as well as the decentralized reporting procedure. The training consisted of a) Description of the obligations of the coordinators for the implementation of the Regulation and b) Presentation of the Platform for public funding of non-governmental organizations.

These contact points have been set up in order to better coordinate the process for drafting the Annual Plan for Public Funding of NGOs and Reporting within the budget organizations themselves and with the Office of the Prime Minister. This aims to meet the obligations of Budget Organizations according to the requirements of the Regulation MoF-No. 04/2017. The main obligations of Budget Organizations regarding the drafting of the Annual Plan for Public Funding of NGOs and the drafting of the Annual Report on public funding of NGOs derive from the Regulation MoF-No. 04/2017. The provisions of the Regulation clearly define the obligations towards municipalities and ministries on these issues, including the deadlines for drafting the annual plan and annual report. The regulation sets out the obligations of all budget organizations for annual planning and reporting regarding public funds allocated to non-governmental organizations in Kosovo.

The Public Funding Platform underwent an upgrade to enable multi-user hierarchical reporting on public funding of CSOs from all Kosovo Ministries/Agencies/Municipalities and their respective units. The Public Funding Platform now facilitates the reporting of public funding with dual data entry, e.g. through direct reporting on the platform of each of the projects funded by public institutions, or mass reporting enabling public bodies to collect data from all sub-units and import data through the platform's import module. In terms of public access on the platform, there are new data filtering features, as well as interactive charts that visualize the data and help the public have an overview of how public money is spent by each institution, the beneficiaries of the CSOs, territories where money was spent and areas and general project activities. Efforts are being made for full implementation of changes and reforms in the platform to take place during 2022. All this is part of the greater efforts of the Office on Good Governance/Office of the Prime Minister and the support of TACSO-3, to facilitate the cooperation of CSOs and the Government of Kosovo.

The achievements and challenges of cooperation between government and civil society have been identified and evaluated in this year's progress report (country report). According to the country report in general, civil society continues to function in a favorable environment. However, civil society and government need to continue to further improve cooperation between them and increase the capacity of civil society to make a significant contribution to public policy development. Efforts are still needed to increase the transparency of public funding for civil society organizations (CSOs). According to this report, even during the pandemic, civil society in Kosovo has continued to

play an important role, especially at the local level. Civil society organizations continue to directly support the development and implementation of EU-related reforms.

Public funding for civil society continues to be reported annually and made available to the public. Basic information about funding authorities, beneficiary bodies and the amount of funds allocated should be supplemented with data on projects and sectors. It is also worth mentioning, at this stage of reporting, that at the beginning of 2022 a review of the current NGO public funding regulation has already been initiated, to address the main obstacles identified during the first years of its implementation.

Given that a number of budget organizations have failed to submit their reports in accordance with the requirements of the Regulation, the Office on Good Governance/Office of the Prime Minister, in addition to the data provided by the reporting organizations, we have also used the database provided by the Treasury Department in the Ministry of Finance as additional and comparative data. Therefore, the report on public funding of NGOs, within the institutions of the Republic of Kosovo for 2021, has been drafted based on the data provided by budget organizations and the Ministry of Finance. The data provided by the Treasury include all payments that have been executed within the period 1 January - 31 December of the respective year for suppliers registered in the Treasury as Non-Governmental Organizations.

In addition, the Office on Good Governance/Office of the Prime Minister has also analyzed the websites of public institutions, to analyze public calls, their content and the process of a public call for NGO funding. The data from the Institutions that have reported have been separately analyzed and have been presented in Annex I of this Report. The second part of the Report has been developed based on the data from the Treasury, in order to enable a comprehensive and comparative presentation with previous years.

The Office on Good Governance within the Office of the Prime Minister is not responsible for the accuracy of direct reporting and records regarding the names of NGOs, or whether their names are registered as such in the Treasury.

1. GENERAL DATA TO BE REPORTED BY BUDGET ORGANIZATIONS

2.1 Reporting by Budget Organizations

Regulation MoF-No. 04/2017, of Kosovo, has built a system with unique rules regarding public funding of NGOs. These rules define the minimum criteria related to public funding. Regulation MoF-No. 04/2017, among other obligations, defines in detail the responsibility that public institutions have for reporting on public funding of NGOs.

The Regulation also defines the role of the Office on Good Governance/Office of the Prime Minister in the process of preparing the Comprehensive Report on Public Funding of NGOs, which is drafted based on the reports from all public institutions. Therefore, the form of monitoring and reporting on public funding to NGOs under this Regulation is very well structured, including the data

that should be contained in the annual report. Pursuant to Article 26 of the Regulation, all Budget Organizations must prepare their report no later than 1 March for the previous fiscal year.

In addition to submitting this report to the Office on Good Governance/Office of the Prime Minister, Budget Organizations should publish the same report on the website of the relevant institution. Office of the Prime Minister/Office on Good Governance is responsible to summarize and publish the comprehensive report of public funding of NGOs, which should include every form of the funding provided to the NGOs during the previous year, in all organizational units of the Budget Organizations in the Republic of Kosovo.

Regulation MoF-No 04/2017 on Criteria, Standards and Procedures for Public Funding of NGOs, which has been approved by the Ministry of Finance, aimed at unifying the procedures for the entire cycle of public funding of NGOs. This process has been continuously advanced, not only by creating and launching the funding platform, but also by enabling direct reporting on the platform on public funding of NGOs <http://ojqfinancime.rks-gov.net/>. Therefore, in 2021, at the beginning of 2022, the platform was enabled to enable all budget organizations to report directly through it, uploading data on public funding of NGOs for the previous year, i.e., for 2021. Reporting has been done according to the Manual drafted by the Office on Good Governance/Office of the Prime Minister/ with the support of TACSO experts and in the format defined by regulation. The Office of the Prime Minister/Office on Good Governance has drafted a comprehensive report of public funding of NGOs in the Republic of Kosovo according to Article 26 of Regulation MoF-No. 04/2017, based on all reports of public institutions.

The drafted manual explains and elaborates in detail the possibilities and steps on how to use the platform for reporting on financial support of CSOs directly on the platform <http://ojqfinancime.rks-gov.net/>. Also, in order to facilitate the work of the contact points for reporting, we have prepared support videos which describe the identification and orientation on the platform, the entry of reporting data and the import of data. The Office on Good Governance together with a TACSO experts have created accounts for each responsible official in the ministry and municipalities for access to the Public Funding Platform for reporting and completing tables directly on the platform.

In the request for reporting, the Office on Good Governance/Office of the Prime Minister has informed the leaders of Budget Organizations that the Regulation, on Criteria, Standards and Procedures for Public Funding of NGOs MoF-Nr. 04/2017, derives from the Law on Public Financial Management and Accountability, therefore, failure to report or delays in reporting constitute a violation of the Provisions of the Law on Public Financial Management and Accountability. The Office on Good Governance has offered its full readiness to provide its expertise and support to all budget organizations in need of drafting the annual report.

Reporting has improved significantly compared to previous years; however, this Report shows that a significant number of institutions/Budget Organizations failed to submit their report to the Office on Good Governance/OPM or failed to report directly to the platform within the deadlines set, as

required by the regulation, or failed to report whether the Budget Organization has funded NGO projects in 2021.

The following figure shows in percentage the number of institutions/Budget Organizations, including Ministries and Municipalities, in terms of reporting on funding in accordance with the requirements of Regulation MoF-NO-04/2017 on Criteria, Standards and Procedures for Public Funding of NGOs. The figure shows that 46% of institutions have reported directly on the platform, 23% have reported that they have not supported non-governmental organizations and 31% have not reported. Therefore, out of 57 institutions (OPM four offices, 15 Ministries and 38 municipalities): 39 institutions / budget organizations have reported and 18 failed to report.

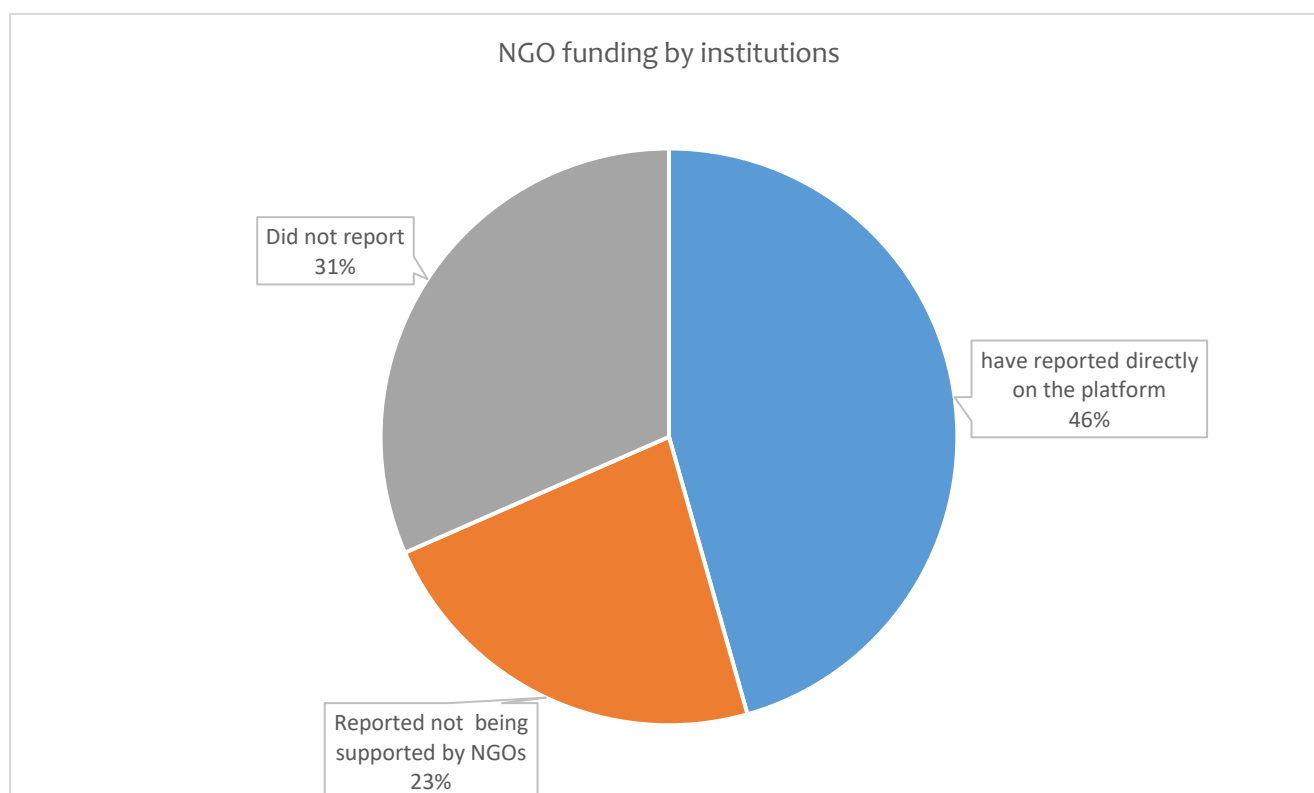

Figure 1. General data regarding reporting by budget organizations

2.2 Data on reporting by each of the Budget Organizations

The following table presents the data regarding each budget organization that was asked to report or funded NGOs in 2021. In cases where a N/A was submitted, the budget organization was not requested to report by Office of the Prime Minister, however, the Treasury data show that the organization in question funded NGOs during 2021. Some of the institutions have stated that they have not funded NGO projects or have not announced public calls. However, the Treasury data show that there are payments to suppliers who according to the Treasury are presented as NGOs. It should also be borne in mind that during 2021, there have been reorganizations in the government

structure, as a result of which some ministries have been merged, while some others have ceased to exist.

Data on public funding of NGOs, according to the reports submitted/reported by the Institutions directly on the platform, the ones that reported that they did not allocate funds and those that have not submitted a report on public funding of NGOs can be found in the table below:

2. GENERAL DATA ON PUBLIC FUNDING OF NGOs AT THE LEVEL OF MINISTRIES, MUNICIPALITIES AND OTHER INDEPENDENT AGENCIES

From the data collected and processed on public funding of NGOs for 2021, it can be concluded that cooperation with non-governmental organizations in achieving government priorities in various fields has continued during 2021. From data analysis submitted by the institutions themselves, during 2021, at the level of ministries, the number of projects for beneficiary NGOs was 636, while at the municipal level it was 574, i.e., a total of 1211 projects.

Even during 2021, central and local level institutions have continued to support the projects and activities of Non-Governmental Organizations, including the funding of specific projects or direct support to NGOs as well as support through the Economic Recovery Package.

Based on the financial data provided by the Treasury for 2021, it results that the public funding of NGOs from public institutions including the Assembly, the Presidency, the Office of the Prime Minister, Ministries, Municipalities and Independent Agencies is about 29,768,569.52 Euros.

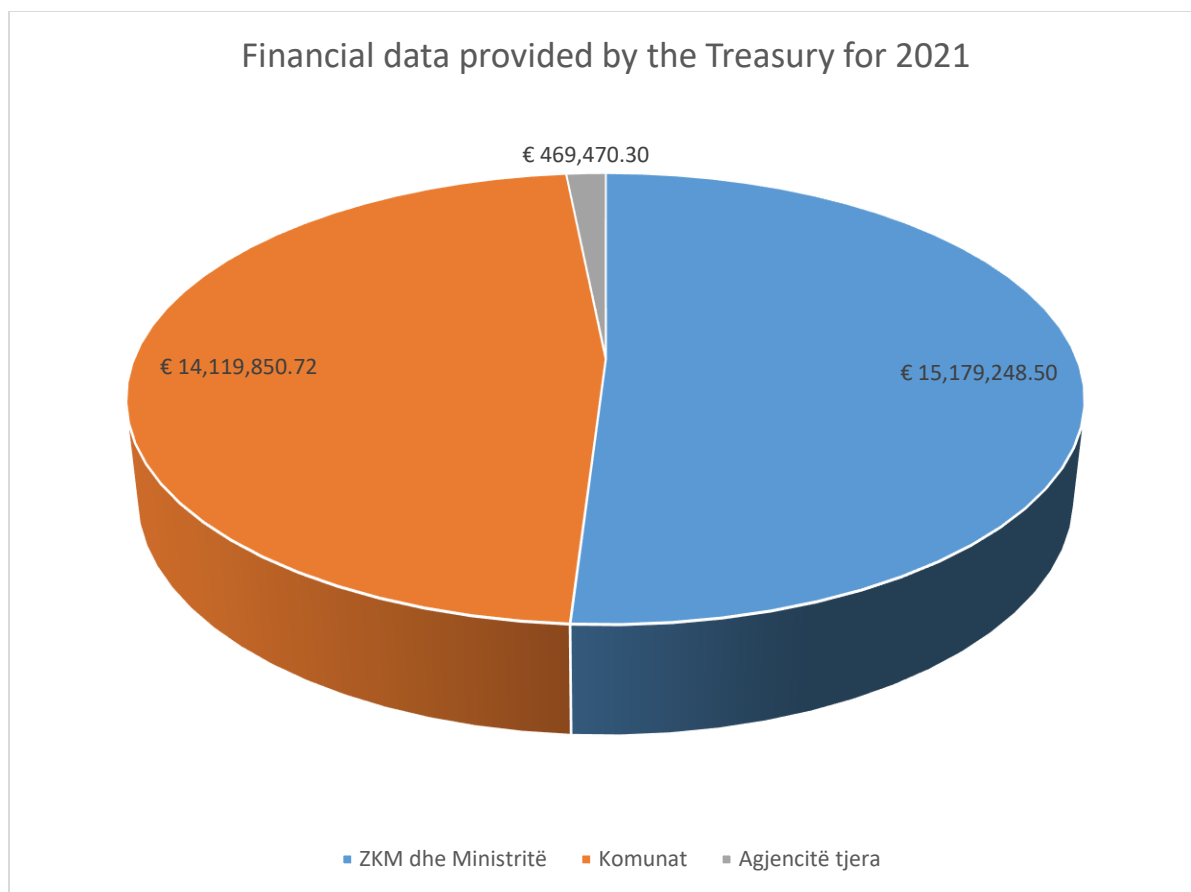

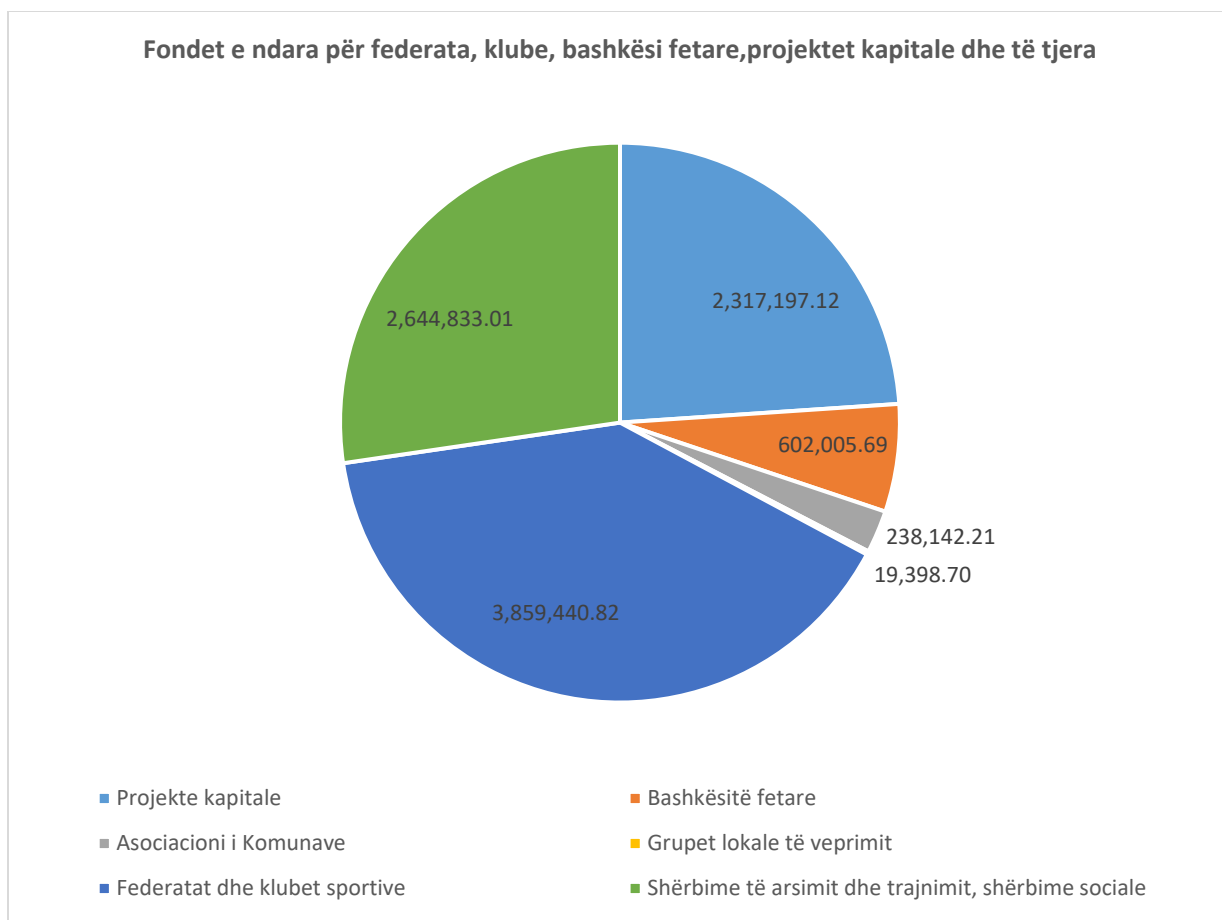

Figure 2. General data regarding the data received from the Treasury

Of these, 2,317,197.12 Euros were allocated for capital projects, 4,602,005.69 Euros for religious communities, 238,142.21 Euros for the Association of Municipalities, 19,398.70 Euros for Local Action Groups, 3,859,440.82 Euros for sports Federations and clubs, around 2,644,833.01 Euros were allocated for other Institutions including education and training, social and other services.

Whereas according to the data reported on the funding platform <http://ojqfinancime.rks-gov.net> from budget institutions/organizations of the Republic of Kosovo, 7,861,439.90 Euros were allocated in 2021. According to these data, line ministries have allocated 5,674,984.27 Euros, while the local level has allocated 2,186,455.63 for CSOs.

The figure below reflects comparative data on public funding for 2021-2020 according to the Treasury. According to these data, the Office of the Prime Minister and the Ministries, in 2021, have allocated 15,179,248.50 Euros compared to 2020 where they have allocated a total of 12,378,332.00 Euros, thus increasing the amount of funds allocated to CSOs. During 2021, municipalities have allocated 13,838,294.12 Euros, while in 2020 they have allocated 6,954,056.00 Euros, so the municipalities have increased the amount of funds allocated in 2021. During 2021, the agencies have allocated 469,470.30 Euros, while in 2020 294,075.00 Euros.

Figure 4. presents the data on public funding of NGOs for 2021 from the report by budgetary institutions/organizations.

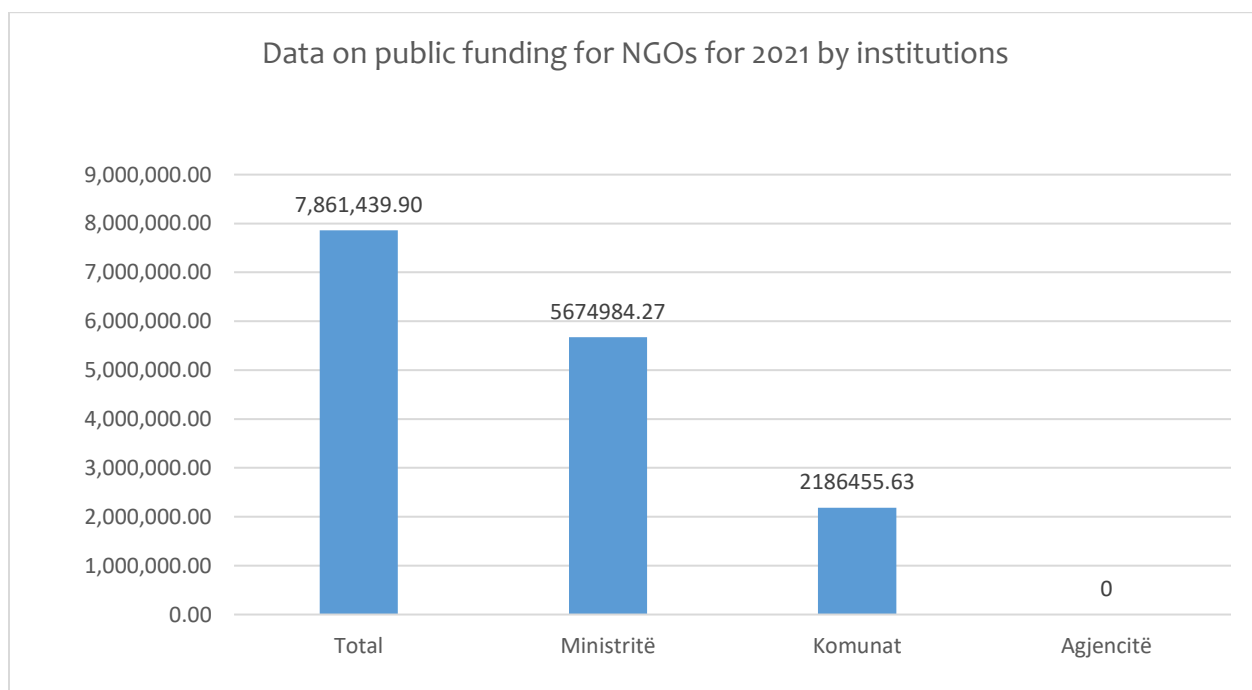

Figure 4. Data on public funding of NGOs for 2021 from the report by institutions

The figure below presents the comparative data on public funding of NGOs from 2019 to 2021, so the data reported by public institutions are compared.

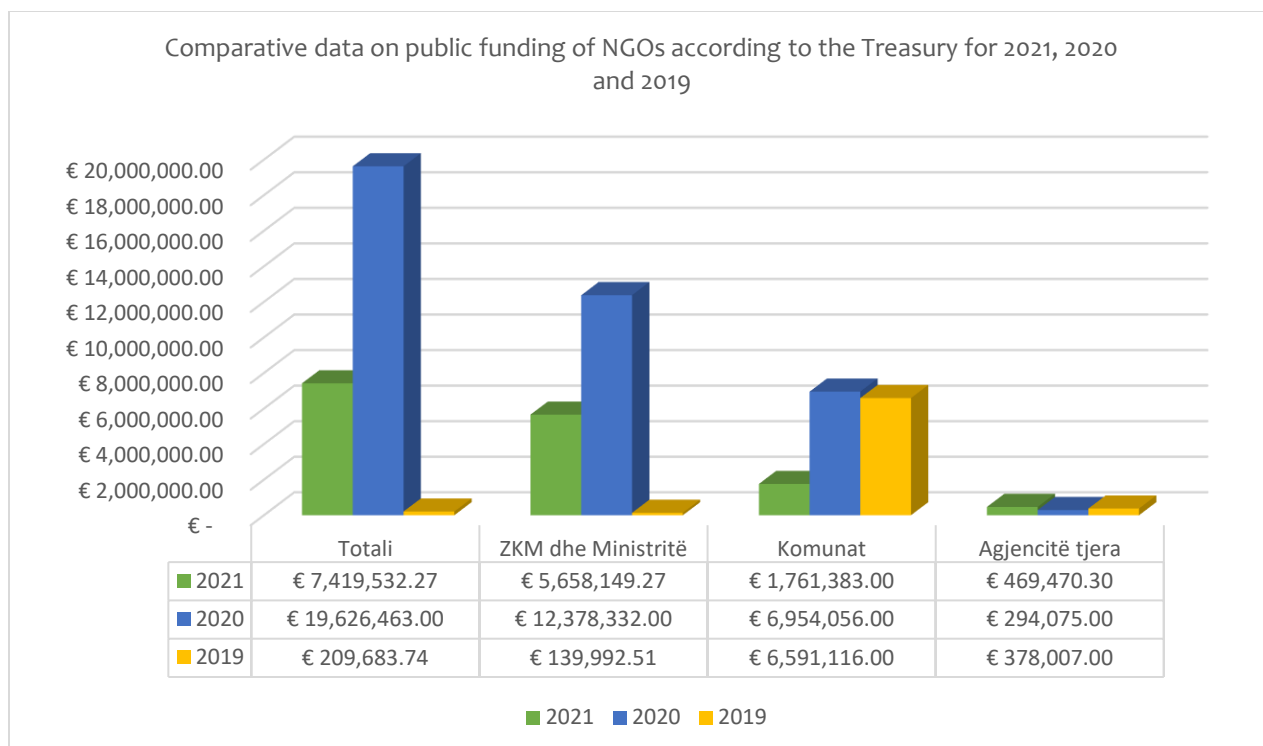

Figure 5. Comparative data on public funding of NGOs 2019 until 2021

During 2021, at the level of ministries and municipalities, there is a significant increase in the number of beneficiary NGOs compared to 2020. At the level of ministries, during 2020, the number of NGOs was 420 while in 2021, it increased to 1073; while at the level of Municipalities, it was 939 and increased to 2677.

The data provide us with all forms of financial support that has gone to suppliers who are registered with the Treasury as Non-Governmental Organizations. This number represents the number of NGOs that have received funds from Budget Organizations. However the same NGOs have received funding from more than one Budget Organization.

Even within other agencies, which mainly report to the Assembly, the number of beneficiary NGOs has increased from 43 to 135.

The following figure shows comparatively the number of beneficiaries of public funding from ministries, municipalities and other agencies for 2019-2021 according to treasury data, which shows that there is a significant increase in support for NGO projects both centrally and locally.

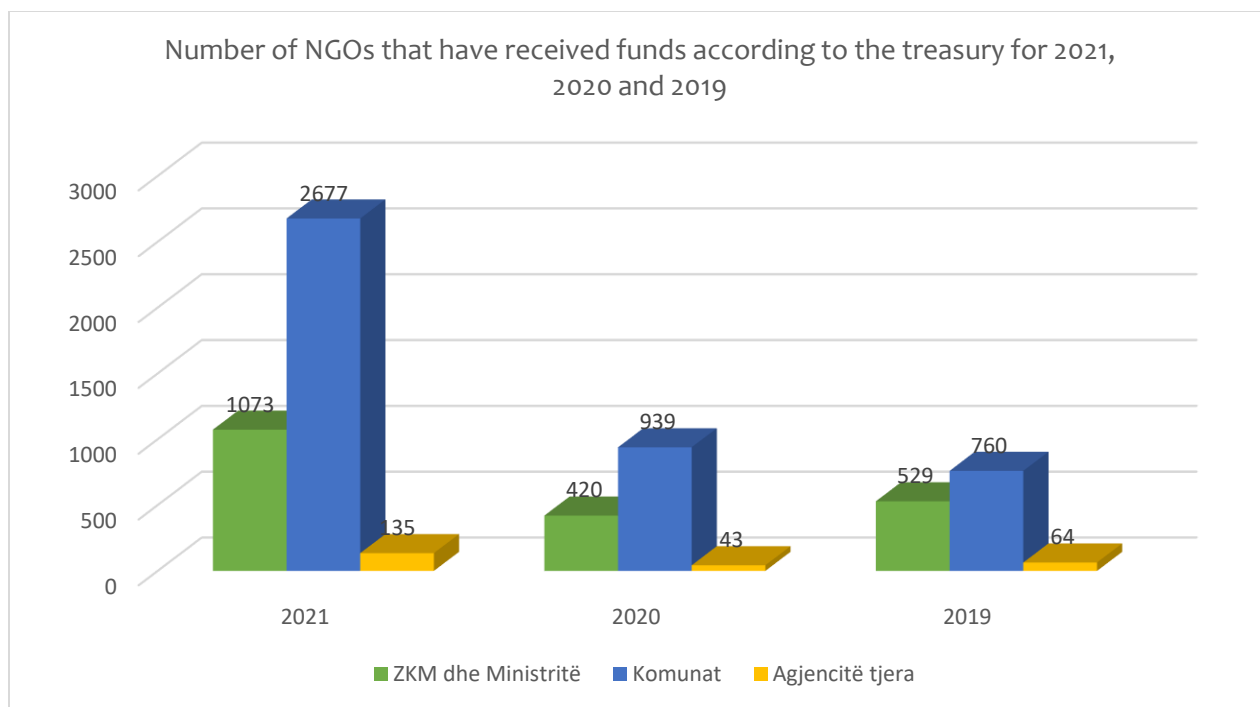

Figure 6. Number of NGOs that have received funding from budget organizations 2019-2021

Purpose of financial support provided by ministries and municipalities

In accordance with the requirements of Regulation, MF-No. 04/2017, and the recommendations of the Assembly, Office on Good Governance/Office of the Prime Minister has initiated the establishment of a standing mechanism that will coordinate the annual planning and reporting work on the funding of non-governmental organizations within each ministry and municipality. In the request for reporting, the Office on Good Governance/Office of the Prime Minister informed the heads of Budget Organizations that the Regulation on Criteria, Standards and Procedures on Public Funding of NGOs MF-No. 04/2017, derives from the Law on Public Finance Management and Accountability. Therefore, failure to report or delays in reporting constitute a violation of the Provisions of the Law on Public Finance Management and Accountability. The Office on Good Governance has offered its full availability to provide its expertise and support to all budget organizations in need for preparation of the annual report.

Compared to previous years, reporting has improved significantly. However, this report shows that a number of institutions/ budget organizations have not reported directly on the platform or forwarded their report as required by the regulation within the deadlines set to the Office on Good Governance within the Office of the Prime Minister or have not reported whether or not the Budget Organization has funded NGO projects in 2021.

The following figure shows in percentage the number of budget organizations including Ministries and Municipalities in terms of whether they reported or not according to the requirements of Regulation MF-No-04/2017 on Criteria Standards and Procedures on Public Funding of NGOs.

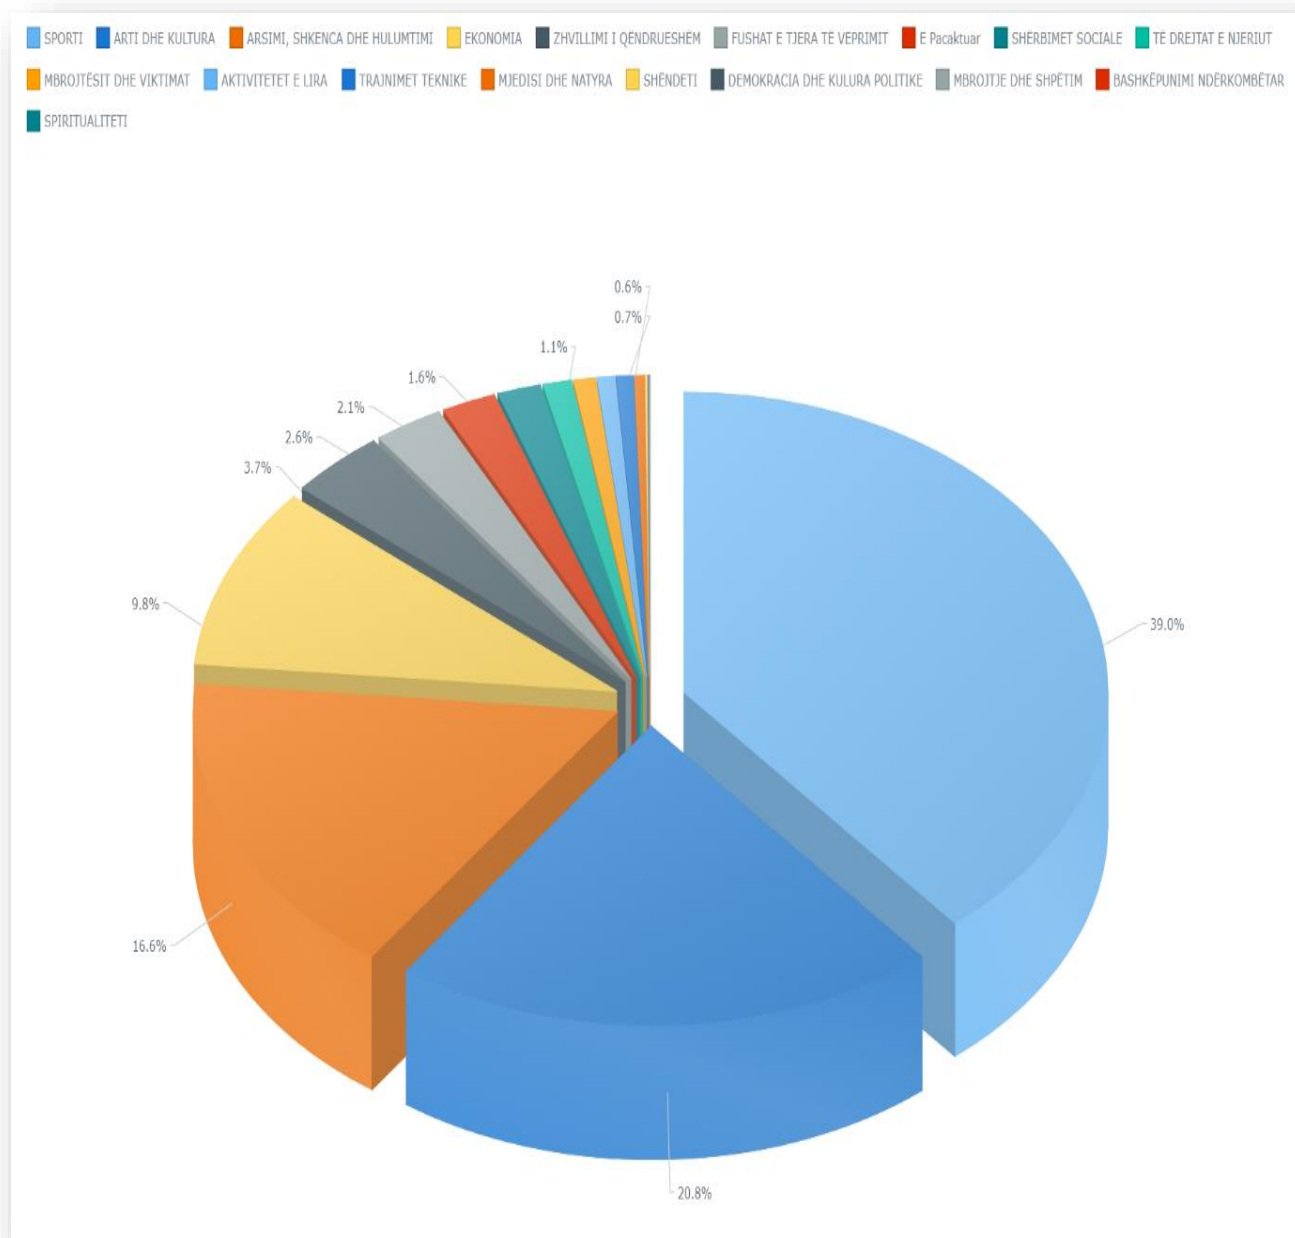

Figure 7. Areas of funding of NGO Projects by the Ministries for 2021 in approximate % percentage of funding

From the above data, it can be seen that the areas that have received funding the most from central and local level institutions are Sports with 39% of the funds, including Sports Federations and sports clubs directly. In addition, a large part of the funds during 2021 are allocated in the following fields: art and culture with 20.8%, education, science and research 16.6%, economics with 9.8% and others.

Sustainable development, mainly includes capital projects, construction of houses, co-funding of capital projects with donors, etc., which have been implemented in cooperation or through NGOs.

Also, a significant amount of funds has been allocated to trainings/education, including professional trainings provided by various NGOs, or other organizations e.g. trainings in the field of accounting, as well as trainings related to the labor market. Part of the support has also been allocated to NGOs representing associations of post-war categories.

In order to inform the public, the Office on Good Governance analyzed the reported data but also the data from all payments made by these institutions and on the basis of those basic data available, it can be concluded that majority of Ministries have supported NGOs in their area of responsibilities and priorities.

Given that based on the available database, it is difficult to distinguish between funded projects and programs and direct support or outsourcing for the provision of services or purchases by NGOs, the said data also include contracted services, including education, training services, etc., provided by organizations registered as non-governmental organizations. For example many of the central institutions have paid for services that have been paid for training such as the American University in Kosovo, which is registered as a non-governmental organization. Likewise, training in the area of accounting and auditing is included as the organizations that provided them are registered as non-governmental organizations.

4.2 Financial Support for NGOs within the MINISTRIES for 2021

According to the reports that we received from the institutions in 2021, there is a significant decrease in the funding of NGOs. The data presented below show the amount of public financial support for NGOs according to reports received from the relevant ministries which was provided in 2021 and the

same was compared with the previous year 2020 (where the data in the figure are according to the Treasury) .

When analyzing the data of public financial support, it can be seen that in terms of the amount of financial support, the institutions that have supported NGO projects the most are the Ministry of Culture, Youth and Sports, the Ministry of Finance, Labor and Transfers and the Office of the Prime Minister.

Figure 8, below graphically presents the data of public financial support for NGOs at the level of Ministries, Office of the Prime Minister and Office of the President for 2021 compared to the previous year 2020.

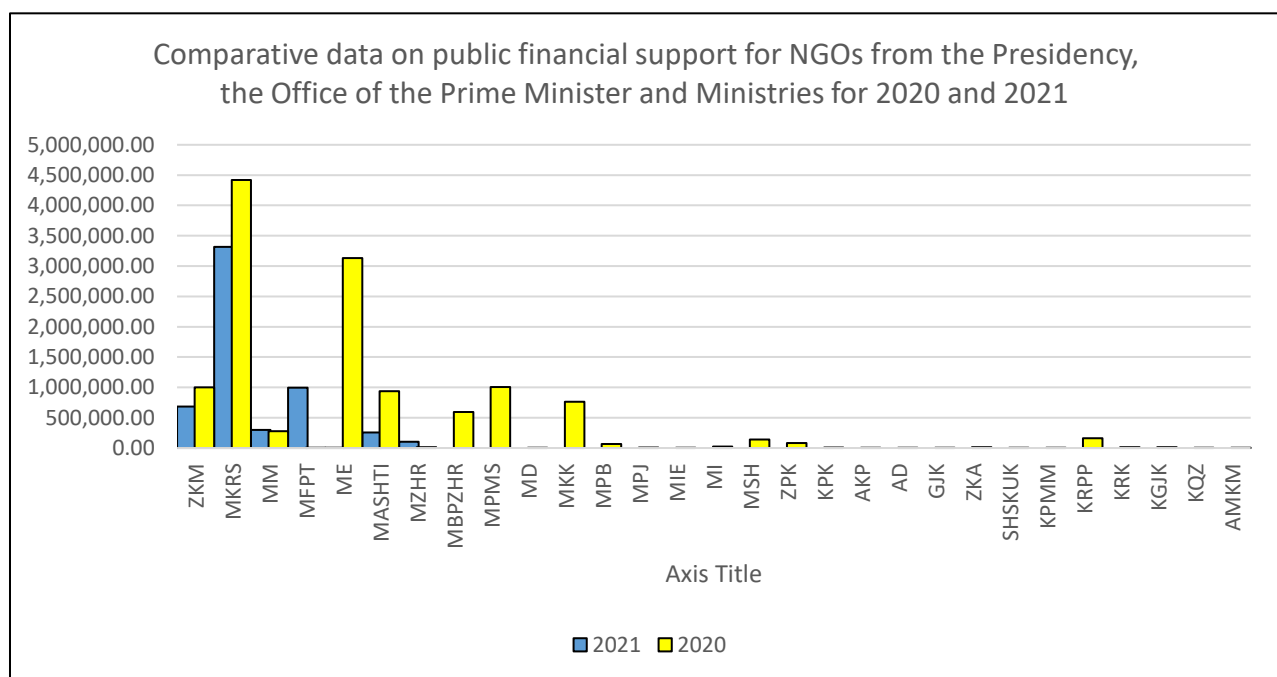

Figure 8. Amount of public financial support at the level of Ministries 2020-2021

While the figure 9 below presents the amount of financial support within the Office of the Prime Minister and Ministries according to Treasury data for 2021 and 2020.

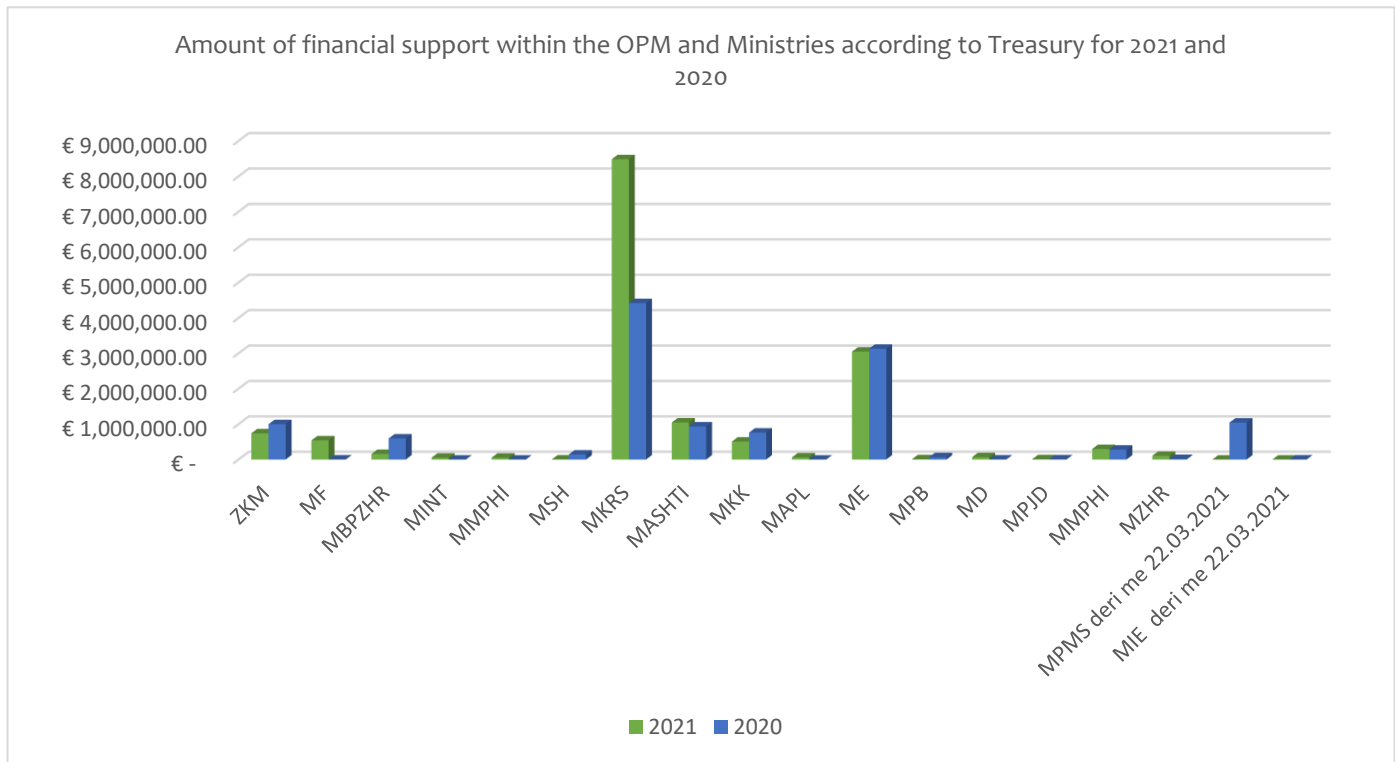

Figure 9. Amount of financial support within the OPM and Ministries according to the Treasury for 2021 and 2020

Figure 10 presents the data according to the Treasury for public financial support for NGOs, for the amounts provided by the Office of the Prime Minister and line Ministries individually, among which MCYS, MoE, MEST, OPM, etc. have provided funds the most.

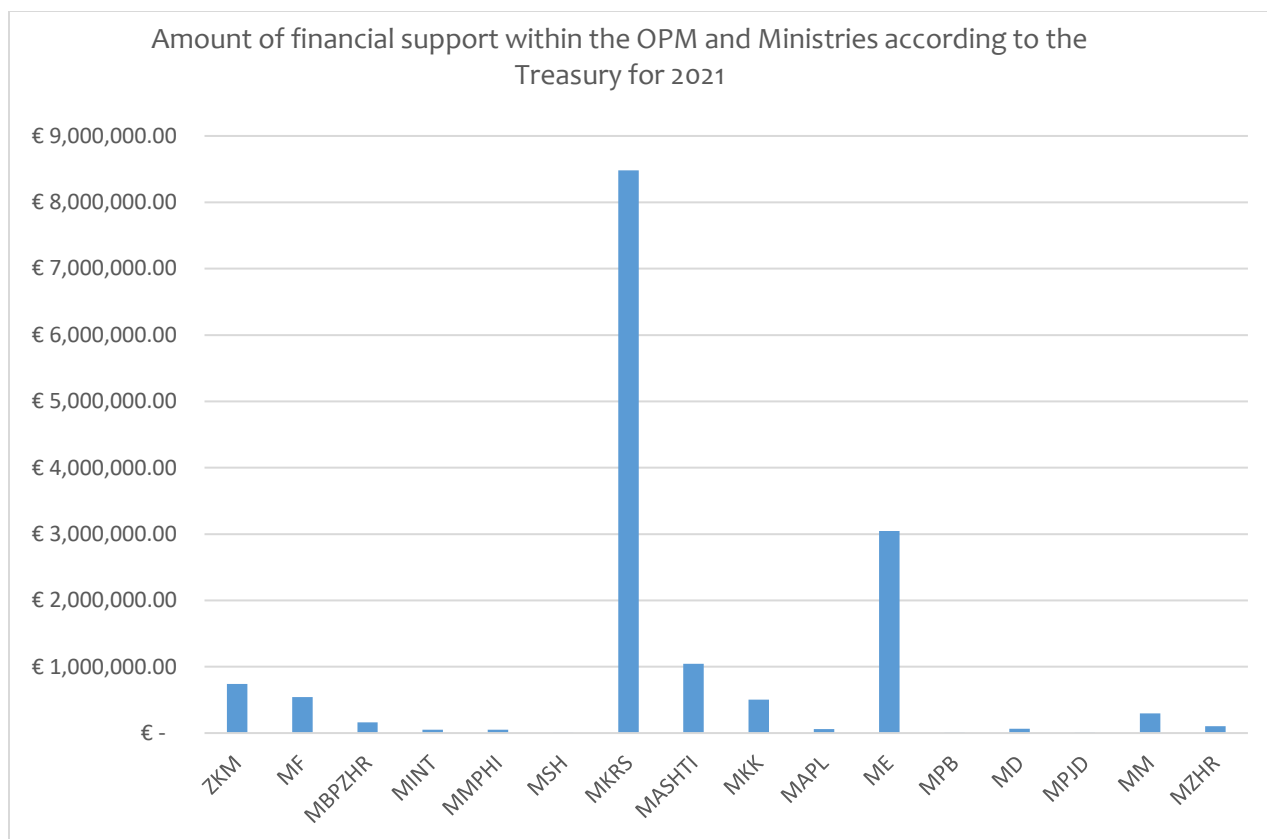

Figure 10. Amount of financial support within the OPM and Ministries according to the Treasury for 2021

4.2.1 Number of projects and amounts of financial support for NGOs benefiting from the financial support of the Office of the Prime Minister and Ministries

Figure 11 below shows the number of beneficiary NGOs within the Office of the Prime Minister and the Ministries. The following data are processed in such a way that although in many cases NGOs have received payments more than once, the following figure shows the processed data on the number of beneficiaries within each ministry, which means that even in cases where an NGO has benefited more than once a year, for the purposes of the report it is considered a beneficiary NGO. This means that more than one project may have been supported within the amount within the year. Also, in many cases it has been identified that payments to NGOs have come from different economic codes within the same budget organization, which points to improper planning by Budget Organizations. For the preparation of the following data regarding the number of beneficiary NGOs, the Treasury data were also taken into account.

Figure 11 shows that the largest number of beneficiary organizations in 2021 are within the Ministry of Culture, Youth and Sports 493 NGOs, the Ministry of Finance, Labor and Transfers 49 NGOs, and the Ministry of Regional Development 36 NGOs.

Therefore, there is an increase of the NGOs that have benefited from the Ministry of Culture, Youth and Sports, compared to the previous year by 290 NGOs.

Thus, from the public financial support to NGOs, provided at the level of Ministries, according to their reporting for 2021, 1155 non-governmental organizations have received financial support, while in 2020 1359 NGOs have benefited, i.e. 204 non-governmental organizations less. From an analysis of the data provided, it can be seen that most of the NGOs that have received financial support in 2021, have received support in previous years from the same institutions. The following figure shows the number of NGOs benefiting from public funds for 2021 according to each ministry and the Office of the Prime Minister. For comparison purposes, we have also included data on the number of beneficiaries from the previous year for each of the other ministries and institutions.

Data on the number of beneficiaries are also presented in tabular form for 2021, as follows.

4.2.3 Analysis of public calls at the level of Ministries

During the preparation of this report, some of the institutions that have provided public financial support to NGOs the most have been analyzed, the activity of which is related to the continuous support of Civil Society. A general analysis of these institutions shows that public institutions have established a practice of developing public calls and consequently the same have been advanced during 2021, marking an undisputed progress in the preparation of public calls, their publication and selection of applicants.

In this context, the data of OPM/AGE, MRD and MCYS were analyzed. Within the OPM, the activity and calls during 2021 for the Agency for Gender Equality have been analyzed, where the latter has announced calls for the implementation of the Kosovo Program for Gender Equality 2020-2024 with the activity and the scope it covers. It is also worth noting that AGE/OPM has reported through the agency's coordinator directly to the platform <http://ojqfinancime.rks-gov.net/lista-e-hollesishme/>. This procedure was used this year for the first time. The data reported by the AGE Funding Coordinator were in full line with the Treasury data.

According to this analysis, the Agency for Gender Equality within the OPM:

- The calls are in line with the scope of AGE activity
- Public call priorities are defined;
- The amounts and number of beneficiaries are determined;

- Timelines have been set;
- Criteria for evaluating applications are defined
- Application instructions are provided
- Beneficiary lists have also been published

Within the Ministry of Regional Development MRD, several public calls announced during 2021 have been analyzed. The Ministry has opened several public calls in various priority areas, given the scope of its activity:

From these public calls, it can be concluded that:

- Public call priorities are defined;
- The amounts and number of beneficiaries are determined;
- Timelines have been set;
- Criteria for evaluating applications are defined
- Application instructions are provided
- The lists of beneficiaries have also been published
- Decisions on calls, etc. have been announced.

Likewise, it is worth noting is that MRD, through the Ministry's coordinator, has reported directly to the platform <http://ojqfinancime.rks-gov.net/lista-e-hollesishme/>. This procedure was used this year for the first time. The data reported by the funding coordinator in the ministry were in full line with the Treasury data.

OGG/OPM has also analyzed the data within the Ministry of Culture, Youth and Sports for some public calls announced during 2021. The Ministry has opened several public calls in various priority areas, given the wide scope of activity of the MCYS.

From these public calls, it can be concluded that:

- *The calls are in line with the ministry's scope of activity,*
- *Public call priorities are defined;*
- *The minimum and maximum amounts are determined as well as the number of beneficiaries;*
- *Deadlines have been set;*
- *Criteria for evaluating applications are defined*
- *Application instructions have been provided*
- *The beneficiary lists have also been published*

It is also worth noting that MCYS, through the Ministry's coordinator, has reported directly to the platform <http://ojqfinancime.rks-gov.net/lista-e-hollesishme/>. This procedure was used this year for the first time. The data reported by the funding coordinator in the ministry were in full line with the Treasury data.

4.3 Support within MUNICIPALITIES

The Republic of Kosovo has a total of 38 municipalities, which according to the Law on public finance management are budget organizations. Out of these 38 municipalities, according to the reports received from them, 20 municipalities have reported directly on the platform, 18 of them have allocated funds and 02 have not provided public financial support to NGOs in 2021.

Data reported by municipalities directly on the platform show that in 2021, in total 2,194,755.63 Euro were transferred to the accounts of Non-Governmental Organizations.

When comparing the amount of public funding for NGO projects by municipalities in 2021 with those of 2020, we see a significant increase in funding of NGOs at the municipal level.

The following figure presents the public financial support for each municipality for 2021 compared to the previous year 2020 where the data in the figure are according to the Treasury.

Comparative data on public finance support for NGOs from the Municipalities of the Republic of Kosovo for 2021 and 2020 according to treasury data

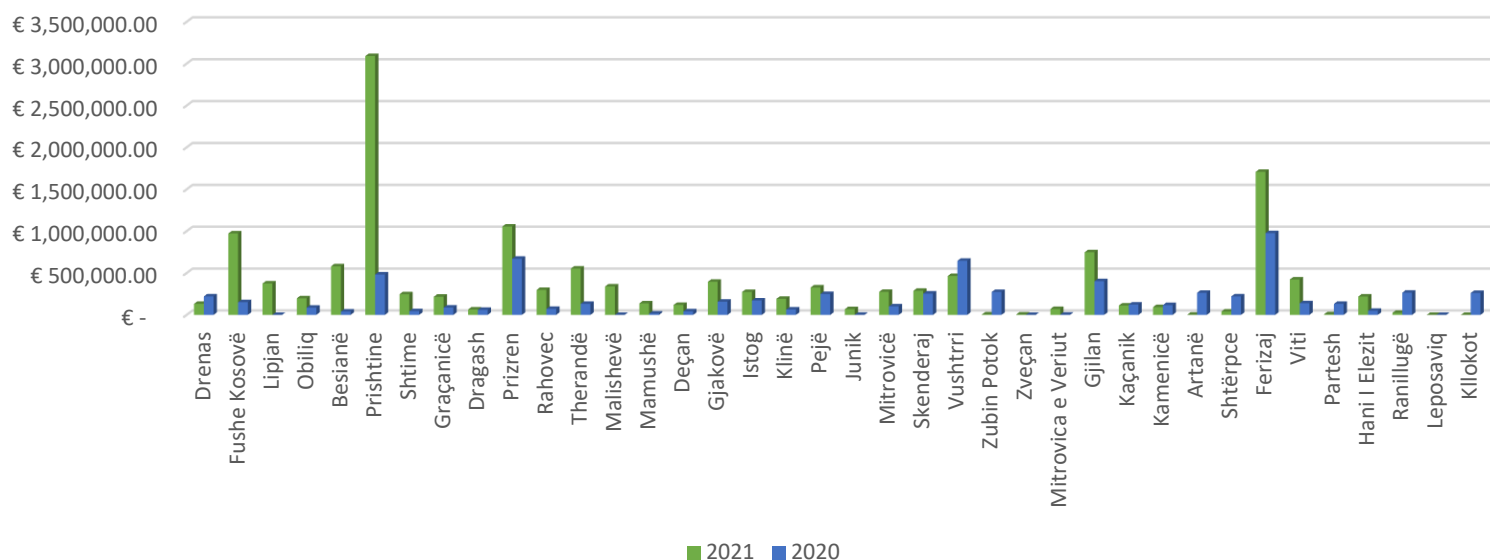

Figure 14. Public financial support for NGOs by municipalities 2021-2020 according to treasury data

The following figure shows the amount of financial support reported directly on the platform by the municipalities themselves, where 20 of them reported directly on the platform, 18 of them allocated funds to NGOs and 2 of them (Municipality of Strpce and Municipality of Klllokot) have reported that during 2021 they have not supported Non-Governmental Organizations.

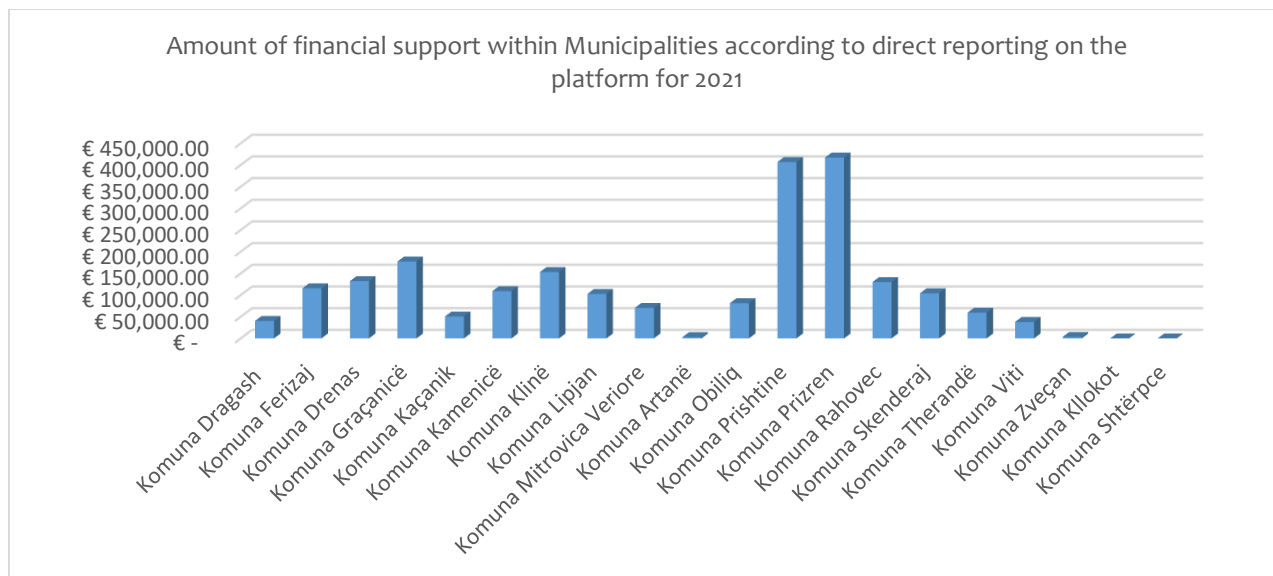

Figure 15. Amount of financial support within Municipalities according to direct reporting on the platform for 2021

4.3.2 Analysis of Public Calls at the level of Municipalities

During the preparation of this report, open public calls from a large number of municipalities were analyzed. A general analysis of these institutions shows that public calls have been advanced during 2021, marking an undisputed progress in the preparation of public calls, their publication and the selection of applicants. Municipalities have mainly supported projects in their scope of activity compared to previous years, and an improvement in the preparation of public calls, the progress of the entire process of public funding of NGOs and especially in the process of direct reporting on the platform can be clearly seen.

From the analysis of the reports and open calls from the Municipality of Prizren, the Municipality of Lipjan, the Municipality of Klina, the Municipality of Mitrovica North, etc. in 2021, we have a significant improvement in their content and in the implementation of the criteria of Regulation Mf-04/2017.

- The calls are in line with the scope of activity of the municipality,
- The priorities of the public call, the priority areas have been defined, including the activities that will be supported through public calls;
- Minimum and maximum amounts have been set, but not all calls have set the number of beneficiaries;

- *The conditions for application are defined, including the deadlines and the manner of application. The Municipality of Prishtina, unlike other municipalities, has built an online application system.*
- *Application instructions are provided, including all necessary forms;*
- *Public calls have also been opened regarding the appointment of external members of the evaluation commission;*
- *Preliminary and final results have been published on the municipality's website;*
- *Criteria for evaluating applications according to the regulation are defined;*
- *The beneficiary lists have also been published;*

The above mentioned municipalities have reported and submitted reports on public funding of NGOs for 2021 according to the criteria and standards of the regulation.

Number of NGOs benefiting from Municipal Funding and distribution according to the amounts of financial support

Also in 2021, at the level of Municipalities in the Republic of Kosovo, a total of 2677 NGOs have been supported. Compared to the previous year 2020, there is an increase in the total number of non-governmental organizations that have received financial support for their projects from municipalities with about 1738 more NGOs.

The following figure graphically shows the number of NGOs that have benefited in each municipality during 2021. For comparison purposes with the previous year, the data on funding during 2020 are included.

4.4 Public financial support from Independent Agencies and other public institutions

The Assembly of the Republic of Kosovo and Independent Agencies have also provided financial support for NGO projects or received services from NGOs during 2021. In 2021, the amount transferred from these institutions to NGOs was 524,227.35 Eur while in 2020, it was 214,529.79 Eur which if compared is 309,697.56 Euros more in 2021.

Also during 2021, funding for NGOs was mainly done as part of direct service delivery agreements.

See the following pictures:

4. CONCLUSIONS AND RECOMMENDATIONS

In the conclusions of the report it can be noted that there has been a significant improvement in terms of reporting institutions to the Office of Good Governance / Office of the Prime Minister, particularly this year for direct reporting on the funding platform <http://NGOfinancime.rks-gov.net>. This is due to the fact that the submission of reports by many budget organizations is still challenging. Hence, also in this report or part thereof, it can be seen that a number of conclusions and recommendations remain the same from the previous year.

In the absence of reports, the OPM had no choice but to use the data from the Treasury for comparison and analysis of these reports, which do not provide the necessary information, particularly regarding the details of the funded projects. The latter provide more financial than substantive data related to the supported projects.

Regulation MF-No. 04/2017 on criteria, standards and procedures on public funding of NGOs uniquely regulates public funding of NGOs for all budget organizations. This regulation is based on the Law on Public Financial Management and Accountability. Article 53 of the LPFMA states: *“The Minister shall have the exclusive authority to issue rules governing the process that shall be followed by the concerned budget organization or public authority when selecting the recipient or recipients and determining the amount or amounts to be provided as a grant, donation or subsidy.”*¹

Therefore, Public institutions should keep in mind that failure to implement this regulation could directly be considered non-compliance with the Law on Public Financial Management and Accountability, which is the main legislation in the field of Public Finance in the Republic of Kosovo.

¹Article 53, Par. 3, Law no. 03 / L-048 on Public Financial Management and Accountability. Electronic version available at: <https://gzk.rks-gov.net/ActDetail.aspx?ActID=2524>

Reporting of public institutions should be structured, in standard forms as required by regulations, making it easier for institutions, to enable a transparency of the use of public funds. Budget Organizations must report any public financial support that has been provided to entities that are registered as Non-Governmental Organizations.

The analysis of public financial support data for NGOs for 2021 shows that the Government of the Republic of Kosovo and other public institutions have continued to provide significant public financial support to NGOs. From the analysis and according to the reporting of the institutions <http://NGOfinancime.rks-gov.net> there is a noticeable improvement and an increased awareness at the level of the Office of the Prime Minister, Ministers , municipalities and other institutions that public financial support for NGOs should be done through public calls. Thus, according to the report for 2021, it is noticed that the provision of direct financial support to NGOs has recorded a major decline.

From the analysis of data reported directly on the platform <http://NGOfinancime.rks-gov.net> but also from the data collected by the Office on Good Governance, this year there is also a significant improvement compared to the previous year as regarding the transparency of funding of NGO Projects. This is due to the fact that the number of public calls by public institutions has significantly increased. However, there are still many cases of direct public financial support through *ad hoc decisions* . Also from the data reported for 2021, it can be considered that there is an improvement in terms of monitoring of funded NGO projects and programs. In contrast to the previous year, the reporting institutions have seen an improvement in data related to project naming as well as funded project activities. However, there is much work and space to be done to improve reporting. On the other hand, public institutions that have not reported at all, should prepare and publish their reports as soon as possible, according to the requirements of the regulation. All public institutions, including ministries, municipalities and independent agencies, should increase transparency regarding public financial support by preparing and publishing on their websites the regular annual reports on public financial support for NGOs.

It is worth noting for this year that most of the public financial support during 2021 was targeted to areas such as Sports, Culture, Sustainable Development where capital projects, projects in support of certain categories, including categories of war, persons with disabilities were also implemented through NGOs, and also areas related to human rights were among the areas of funding.

In 2021, direct reporting was launched on the platform <http://NGOfinancime.rks-gov.net> and as noted above there were 47% of institutions that reported directly on the platform, 23% reported that they did not support government organizations and 30 % that did not report. Hence, 39 institutions / budget organizations have reported while there are 17 of them that have not reported.

According to the regulation, these reports should include, inter alia: a) The name of the public financial support provider (Ministry, municipality, ministry, agency, including specific programs under which public financial support is provided); b) Manner of allocation of public financial support (through call / direct contracting); c) The public call through which the financial support was

provided; d) Full name of the beneficiaries of financial support (including other details of the beneficiary, Address, Registration Number and Fiscal Number and data on the responsible person of the NGO; e) Name of the project / program or activities funded; f) The amount granted for the financing of the project / program; g) Duration of the project and the status of its implementation; h) General and specific areas of funding; i) Direct and indirect beneficiaries; j) Main activities or services implemented within the project; k) Geographical data regarding the place of project implementation; l) The number of persons who have benefited or been employed within the project / program. Form 20 should be used for the purpose of standard reporting, which is an integral part of the regulation and the funding platform <http://NGOfinancime.rks-gov.net> and as of this year the coordinators have had the opportunity to report directly on the platform.

Recommendations for institutions / budget organizations regarding public calls and proper implementation of the Regulation:

- Public institutions / budget organizations shall announce public calls for each public financial support for NGOs according to Regulation MF-No. 04/2017.
- Budget organizations should set clear criteria in public calls in accordance with the requirements of the regulation. These criteria should also include the types of eligible activities, the types of eligible and ineligible costs, the minimum and maximum amount of funding, and other specific requirements required by regulation MF-No. 04/2017 on criteria, standards and procedures for public funding of NGOs.
- Based on the criteria of Regulation MF-No. 04/2017, competitiveness should only be between NGOs.
- When drafting the public call, Institutions/Budget Organizations should not set significant differences between the minimum and maximum amounts for projects. This will facilitate the work of the evaluation committees and will enable a fair evaluation.
- It is recommended that Institutions/Budget Organizations divide public calls into priority areas and if necessary determine the minimum, maximum and total amounts within the priority area in these calls and priority areas. This should be done so as to enable a comprehensive approach and a fair evaluation of project proposals.
- Reports on public funding of NGOs according to the rules and standard form of the regulation, budget organizations must publish on their websites / on the funding platform, by March 1 of each year, for the previous year. Institutions/Budget Organizations that have not yet published the reports and which have not sent them to the OGG should publish them on their websites.
- It is recommended that the contact points in the ministries and municipalities be supported by their leaders for the preparation of the annual report of public funding of NGOs according to the requirements of the legislation in force.
- Terms of Reference for Contact Points / Coordinators shall be approved and forwarded to the responsible institutions.
- Continue with training / capacity building of funding contact points / coordinators for reporting and planning procedures for public funding of NGOs by the Office on Good Governance / Office of the Prime Minister and the Ministry of Finance .
- Promote the NGO public funding platform <http://NGOfinancime.rks-gov.net>.
